

Brother ScanNCut CM900 Home and Hobby Cutting Machine

How to use your ScanNCut machine for creative cutting:
Before you use your desired medium, consult the product manual.

1. Load the mat with the medium you will be using for your project (paper or fabric, etc.) into the machine.
2. Set your blade and cut pressure to get a clear cut.
3. Choose the right pattern for your project.
4. Cut the pattern out and unload the mat.

Features of the Brother ScanNCut CM900:

- Large 12,3cm colour LCD touch screen for easy use.
- Large 12" x 24" scanning and cutting area.
- SVG data readability – supports a universal design-file format.
